

100gpon device

Overview

This GPON converter is equipped with a SC connector and a 10/100/1000Mbps Gigabit LAN connector RJ45. The converter can be used for converting a GPON signal to copper (LAN) and thus enables the use of existing devices such as routers, cameras, VoIP telephones and the like. Nokia and Elisa become first in Europe to trial 100G PON over live fiber broadband network. Already deploying the Nokia 10G fiber solution, Elisa is planning to deploy 25G, and beyond. Elisa uses Nokia fiber solution to become the first European operator to demonstrate up to 100Gb/s broadband speeds. Espoo, Finland – Nokia today announced that NBN Co, Australia's largest wholesale broadband provider, has successfully completed the world's first live network demonstration of multiple next-generation PON technologies. The trial demonstrated that a mix of PON technologies – 100G, 50G, 25G. The Huawei OptiXstar EG8145X6-10 is an intelligent GPON and Wi-Fi routing-type ONT. It uses the GPON Wi-Fi technology to implement ultra-broadband access, high performance and wide coverage for users.
