

48-port network patch panel number of units

Overview

QUICKPORT™ High-Density 1RU Patch Panels support 48 ports while filling only one unit of rack space. The panel fits all industry-standard 19" racks and cabinets, and is compatible with all category-rated jacks, including Cat 5e, Cat 6, Cat 6A, and QUICKPORT fiber adapters. Choose a 24-port patch panel when you care about clean labeling, comfortable “finger room,” and fast moves/adds/changes—especially if technicians touch the rack often and you want straightforward port-to-port mapping (Panel 01-24 ↔ Switch 01-24). This patch panel enables quick, easy cable patching. It shall be UL Listed and comply with ANSI/TIA-568. The Panduit offers an extensive selection of modular patch panels, with various styles and port densities and an assortment of labeling options making them ideal for any installation. Available in Cat6, Cat5e, and blank keystone configurations for your network.
