The new Virtual Services Platform 8600 Series is Avaya's next-generation, high-performance, small-format Chassis-based Modular Ethernet Switching platform. It is positioned as highly scalable platform delivering a broad range of interface connectivity - Gigabit through to 100 Gigabit - and intended. The Avaya Ethernet Routing Switch 8600 or ERS 8600, previously known as the Passport 8600 or the Accelar 8000, is a modular chassis combination hardware router and switch used in computer networking. The system, originally designed and manufactured by Nortel, was manufactured by Avaya from 2009. The Cisco 8608 is a Q200-based, 7-RU router that provides 12.8Tbps of network bandwidth and supports centralized architecture. Built particularly for the backbone, the 16-slot X-Pedition 8600 switch router combines wire-speed performance at gigabit rates.
