

Belarusian Optical Cable Junction Box 24 Cores

Overview

GJS-24-D (PLC) 24 Cores SC fiber optic joint closure is a kind of small junction box that is used to join the fiber bundles and protect them during cabling installation, preventing the cables from abrasion and other damage. The 24 core joint box is a pivotal component in the realm of fiber optic equipment, designed to provide a secure and organized method for housing fiber optic splices. Serving as a termination point for feeder cables to connect with drop cables, this box integrates fiber splicing, splitting, distribution. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable.
