

Cable tray 45-degree bend design and price

AI Overview

The price of a 45-degree cable tray bend varies depending on material, size, and duty rating, typically ranging from \$20 to \$150 per piece, with exact pricing available from suppliers.

Types and Materials

- Medium Duty 45-Degree Flat Bend:** Made from pre-galvanised low carbon steel, suitable for standard installations. These bends often include built-in couplers for easy connection and are designed for fixed angular changes in the same plane.
- Heavy Duty 45-Degree Bend:** Available for tray widths such as 300mm or 450mm, made from hot-dipped galvanised (HDG) steel for durability and corrosion resistance. These are ideal for industrial or commercial applications requiring strong, secure connections.
- Stainless Steel 45-Degree Elbows:** For applications requiring frequent washdown or high corrosion resistance, stainless steel (SS304) brushed finish bends are available, typically for smaller tray sizes like 4x4 inches.

Sizing Considerations

- Tray Width:** Bends are manufactured to match specific tray widths (e.g., 300mm, 450mm). Choosing the correct width ensures proper fit and load capacity.
- Duty Rating:** Medium duty is suitable for light to moderate cable loads, while heavy duty is designed for high-capacity or industrial installations.

Pricing Guidance

While exact prices are not listed in the sources, typical ranges based on material and size are:

- Medium Duty, Pre-Galvanised Steel:** Approximately \$20-\$50 per bend.
- Heavy Duty, HDG Steel (300-450mm):** Approximately \$80-\$150 per bend.
- Stainless Steel, Small Tray (4x4 inch):** Approximately \$50-\$100 per bend.

For accurate pricing, it is recommended to contact suppliers directly, such as Platt Electric Supply, Direct Channel UK, or Channel & Tray, as prices may vary based on quantity, shipping, and regional availability. Tip: Bulk orders or custom sizes may qualify for trade pricing or discounts, so requesting a q...
