

## Cable tray procurement in Belgium

### AI Overview

Tray-type cable trays in Belgium can be procured from specialized domestic manufacturers, pan-European suppliers, and global distributors, with selection guided by material, load rating, environment, and compliance with IEC and EU standards.

**Market Overview** The Belgian cable tray market is mature and evolving, driven by industrial modernization, renewable energy projects, data center expansion, and smart building infrastructure. Demand is particularly strong for tray-type solutions such as ladder trays, solid-bottom trays, and perforated trays, which are preferred for their ventilation, load capacity, and ease of cable management. Procurement is influenced by both project-based contracts with EPC firms and MRO sales through electrical wholesalers for smaller-scale or retrofit applications.

**Supplier Options**

- Trayco:** A Belgian manufacturer producing 100% locally made cable trays, mesh trays, and ladders, offering tailored solutions and installation guidance.
- Europages Directory:** Lists multiple Belgian suppliers of metal cable tray systems, allowing direct contact with wholesalers and manufacturers for quotes and bulk orders.
- Plastic Cable Tray Suppliers:** Specialized reports indicate a growing market for plastic cable trays and ducts, suitable for corrosive or lightweight applications.

**Material and Type Considerations**

- Galvanized Steel:** Ideal for heavy industrial and outdoor applications due to strength and durability.
- Stainless Steel:** Recommended for corrosive environments such as chemical plants, food processing, or coastal installations.
- Aluminum:** Lightweight and corrosion-resistant, commonly used in data centers and telecom installations.
- FRP/PVC:** Non-metallic options for chemical or highly corrosive zones, though with lower load ratings.

Tray types include ladder, solid-bottom, trough, and wire-mesh, selected based on cable type, ventilation needs, and aesthetic requirements.

**Regulatory and Quality Standards** Procurement must ensure compliance with IEC 61537 (mechanical load, electrical continuity, corrosion...
