

Cable tray side support fixing bracket

AI Overview

Side fixing brackets are designed to attach cable trays to walls, struts, or other surfaces, providing secure support and enabling side loading of cables. Types of Side Fixing Brackets

- Universal Brackets** These attach to the side of basket trays and can also be fixed to walls to support the tray. They allow mounting of electrical accessories and provide versatile installation options for different surfaces (Midfix)
- Suspension Brackets** Lightweight brackets like the LBCEL series support cable trays and baskets while allowing side loading of cables. They can be fixed directly to walls, struts, or framing channels. Fixing holes are typically M10 clearance with elongated slots for easy alignment. Some models, such as the LBCE501, provide additional end support for larger trays (Haley Products)
- Couplers and Clamps** Premier Basket Couplers attach to the side of wire basket trays, securing sections together or providing mounting points for accessories. They often feature tabs that fold down for a secure fit and can be reinforced with M6 threaded clamps. These are available in pre-galvanized or hot-dipped galvanized steel for durability (Direct Channel)
- Cable Tray Supports and Hangers** Brackets can also function as supports or hangers, fixed to walls or overhead structures. They are used to maintain horizontal runs, support directional changes, and protect cables from dust or falling objects. These supports are compatible with solid-bottom, ventilated, or ladder-type trays (RS Components)

Installation Considerations

- Material and Finish:** Choose corrosion-resistant materials such as pre-galvanized or hot-dipped galvanized steel for durability.
- Load Capacity:** Ensure the bracket can support the weight of the tray and cables.
- Mounting Surface:** Brackets can be fixed to walls, struts, or framing channels depending on the installation environment.
- Ease of Use:** Some brackets feature quick-click fittings or tabs that secure without additional tools, simplifying installation (Direct Channel)
- Compatibility:** Verify that the bracket matches the tray type (wire mesh, solid, or la...
