

Cable tray tee fixing accessories

AI Overview

Cable tray and tee connection accessories are essential components that allow cable trays to branch, connect, and change direction efficiently, available in various materials and configurations for light, medium, and heavy-duty systems.

Overview of Cable Tray Accessories Cable tray accessories are components designed to connect, support, and guide cable trays in electrical and communication installations. They ensure a safe, organized, and accessible cable management system while accommodating changes in direction, elevation, or width. Common accessories include tees, elbows, crosses, bends, reducers, risers, covers, and supporting brackets. These fittings are typically made from galvanized steel, stainless steel, aluminum alloy, or fiberglass-reinforced plastic (FRP) to provide durability and corrosion resistance.

Tee and Crossover Connections Tees and crossovers are used to branch cable trays or allow multiple trays to intersect. They come in equal and unequal configurations to match tray widths and system requirements. These accessories are available for light, medium, and heavy-duty trays, with widths ranging from 50mm to 900mm. They can be supplied with closed or ventilated covers to protect cables while maintaining airflow.

Types of Tee Connections

- Equal Tee:** All three branches have the same width, ideal for symmetrical branching.
- Unequal Tee:** One branch differs in width, suitable for connecting a smaller tray to a main line.
- Crossovers:** Allow two trays to intersect at right angles, facilitating complex routing.

Installation and Support Tee and crossover accessories are typically bolted or clamped to the main tray sections. Supporting brackets, suspension rods, and connecting plates are used to maintain stability and load-bearing capacity. Wire mesh or ladder-type trays can be cut, bent, and connected to these accessories to achieve curves, slopes, or branching configurations.

Material and Finish Options

- Mild Steel Pre-Galvanized (PG):** Standard corrosion resistance.
- Hot-Dip Galvanized (HDG):**...
