

# Cambodia Tray Cable Tray Service

## AI Overview

Cable tray installation in Cambodia follows a structured process including material approval, site preparation, installation, and inspection to ensure safety and compliance with standards.

- 1. Material Approval and Preparation** Before starting, all materials such as cable trays, ladders, trunking, and accessories must be submitted for consultant approval according to project specifications. Inspect materials for damage, conformity to approved submittals, and suitability for the site. Unsuitable or damaged materials should be removed immediately. Store materials in a covered, dry area with timber supports to prevent corrosion and deformation, protecting them from moisture and direct sunlight.
- 2. Site Inspection and Safety Measures** Examine the installation area to ensure it is safe, accessible, and free from hazards. Check the layout and dimensions against approved shop drawings, including mounting heights and feeder configurations. Install safety barriers and warning signs to protect workers and prevent interference with other trades. Ensure all operatives have completed safety induction and competency verification.
- 3. Installation Steps** Review approved shop drawings for tray layout, lengths, and locations. Verify tools and equipment comply with contract requirements. Mark and identify each tray or conduit by feeder name and branch number. Install supports and brackets according to design specifications, maintaining proper spacing and alignment. Lay cable trays and ladders, ensuring correct orientation, minimum bend radius, and secure connections. Install covers or protective elements if required, especially for sensitive instrumentation or control cables.
- 4. Inspection and Quality Verification** Conduct visual and dimensional inspections of installed trays, conduits, and accessories. Verify grounding connections and adherence to approved designs and standards. Complete inspection checklists and test plans to ensure compliance with QA/QC requirements. Any deviations or non-conformities should be reported and corrected...
