

Campus Network Access Switch

Overview

Cisco Catalyst and Cisco Meraki campus LAN access switches combine wired and wireless to help you drive digital transformation, reinforce security, and simplify your network. Transform your network—big or small, campus or branch—to handle the demands of a new kind of workplace. If DHCP OFFERS are seen coming from any untrusted port, they are dropped. L2 device only – connecting end users! L2 device only – connecting edge switches! Fibre to building distribution, or is copper enough?

But would you be. Campus switches are an integral part of any network, responsible for end-to-end connectivity within any organization. Easy to set up and use, they provide ideal combination of affordability. This document provides a pre-validated design & deployment guide for "a" Hybrid Campus LAN comprising both Cisco and Meraki platforms alongside the various design guidelines, topologies, technologies, configurations, and other considerations relevant to the design of any highly available.
