

Cost of galvanized cable trays in Haiti

AI Overview

The cost of galvanized cable trays in Haiti typically ranges from \$2 to \$25 per meter, depending on material, type, size, and supplier. Estimated Pricing Galvanized cable trays, especially hot-dip galvanized ladder types, are commonly used for electrical installations due to their durability and corrosion resistance. The average price per meter ranges from \$2 to \$25, with bulk orders often reducing the cost. Factors influencing the price include:

- Material:** Galvanized steel is the most common and cost-effective, while stainless steel or aluminum trays are more expensive.
- Type:** Ladder trays are stronger and cost more, whereas perforated or wire mesh trays are cheaper.
- Length and fittings:** Standard trays are usually 2.4 meters long, and fittings are priced per piece.
- Coating:** Hot-dip galvanization (HDG) is more durable but slightly more expensive than pre-galvanized options.
- Shipping and labor:** Importing trays to Haiti may add to the cost, along with installation expenses.

Local Suppliers Several suppliers in Haiti provide galvanized cable trays, including Brilltech Engineers and Jeetmull Jaichandlall, offering products designed for easy installation, durability, and corrosion resistance. Contacting these suppliers directly is recommended to obtain accurate quotes based on your project size, tray type, and delivery location.

Cost-Saving Tips Bulk orders can significantly reduce per-meter costs. Choosing perforated or wire mesh trays instead of ladder trays can save up to 15% if heavy load capacity is not required. Local sourcing may reduce shipping costs compared to importing from overseas suppliers. In summary, while exact prices in Haiti vary by supplier and project specifics, you can expect galvanized cable trays to cost roughly \$2–\$25 per meter, with additional costs for fittings, shipping, and installation. Contacting local suppliers will provide the most precise pricing for your needs.
