

Cost of wiring terminals for Greek electrical distribution boxes

AI Overview

Wiring terminals for Greek electrical distribution boxes typically cost between €0.50 and €5 per terminal, depending on type, material, and amperage rating.

Overview of Terminal Types and Costs

- Screw-type terminal blocks** Common in residential and commercial distribution boxes. Price range: €0.50–€2 per terminal depending on current rating and number of poles. Available from Greek suppliers like Elektronik.gr and Electrotrust ().
- Push-in or spring clamp terminals** Faster installation, often used in modern DIN rail-mounted boxes. Price range: €1–€5 per terminal, depending on cross-section capacity and brand. WAGO's TOPJOB® S series is a popular option in Greece, offering reliable push-in connections for solid and fine-stranded conductors ().
- Porcelain or polypropylene terminals** Used for higher temperature or specialized applications. Price range: €2–€4 per terminal, depending on amperage and number of poles ().

Factors Affecting Cost

- Material:** Plastic vs porcelain or metal terminals.
- Current rating:** Higher amperage terminals cost more.
- Number of poles:** Multi-pole blocks are more expensive.
- Supplier and brand:** Imported brands like WAGO or Wieland may be pricier than local Greek brands ().
- Installation complexity:** Labor costs for wiring can add €50–€150 per distribution box depending on size and number of connections ().

Practical Advice

For residential projects, standard screw-type or push-in terminals are usually sufficient. For commercial or industrial installations, consider DIN rail-mounted push-in terminals for faster installation and future-proofing. Always check supplier catalogs like Elektronik.gr or Electrotrust for bulk pricing and availability (). Factor in installation labor if hiring a licensed electrician, as this can significantly affect total cost. In summary, the unit cost of wiring terminals in Greece ranges from €0.50 to €5, with total project cost depending on the number of...
