

Distribution box number ZXF

AI Overview

ZXF refers to a type of distribution box or industrial drive system, commonly used in low-voltage electrical distribution and motion control applications.

Overview of ZXF Distribution Boxes

The ZXF designation is part of a broader classification system for distribution boxes and low-voltage switchgear. Distribution boxes are generally categorized based on installation type, current rating, and protection features. ZXF boxes are typically associated with industrial or integrated distribution systems, often providing precise control and protection for electrical circuits or machinery.

Classification and Model Numbering

Distribution boxes are identified by model numbers that indicate their type, configuration, and capacity:

- GCK, GCS, MNS: Low-voltage draw-out switchgear
- GGD, GDH, PGL: Low-voltage fixed switchgear
- Xzw: Integrated distribution box
- Zbw: Box-type substation
- GXL: Low-voltage distribution cabinet
- JXF: Electrical control box
- Pz20, Pz30, Pz40: Terminal lighting distribution boxes
- ZXF: Often used in industrial drives or as a specialized distribution box with following options for velocity and distance control in motion systems

The model number typically includes information about:

- Mounting type: Surface-mounted (Pxt) or concealed
- Series wiring mode: Indicated by letters like K
- Rated current / short-time withstand current: Expressed numerically, e.g., 250A / 10kA
- Incoming line type: Single-phase, three-phase, or mixed
- Outgoing circuits: Number of single-phase or three-phase circuits
- Main switch type / protection grade: e.g., IP30 for protection level

Applications

ZXF distribution boxes are used in:

- Industrial automation: As part of motion control systems, providing precise positioning and velocity following capabilities
- Electrical distribution: Protecting circuits in commercial or industrial settings, often integrated with low-voltage switchgear
- Machine control: Offering programmable inputs and outputs for flexible integration with PLCs and other control systems
