

Dual-fiber optic interface 8-port switch

Overview

Developed for long distance fiber installations. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy. Altronix NetWaySP8WP3 supports up to 60W per port (360W total power) for deploying the latest high-powered IP devices in remote locations. This dual fiber optic SFP 1G link media converter ensures efficient data transmission, making it ideal for various networking applications. The design of 8 gigabit optical ports +2 gigabit electrical ports can not only provide point-to-point networking mode, but also provide. Multi-gigabit optical aggregation series is my company based independent software research and development from a fiber aggregation switches, which have 8 * 1000M optical ports and 2 * 10/100 / 1000M adaptive Ethernet electrical interface., Transmission distance: Multimode: 550m; Single-mode:. 8 port Fiber Optic SFP switch allows you finish fiber connectivity that is with different bandwidth requirements conveniently and cost savings. A standard product features gigabit uplink speed, easy installation, high security, flexibility of selecting SFP modules, which gives ease of management.
