

East Asia Fiber Optic Cables and Network Cables

Overview

This strategic analysis provides a comprehensive examination of the optical fibers, bundles, and cables market across Eastern Asia, with a detailed assessment of the 2026 landscape and a forward-looking projection to 2035. The East Asia To North America (E2A) cable system is a 12500km submarine cable connecting major digital hubs in Asia and North America, with landings in Toucheng (Taiwan), Busan (South Korea), Hokaiido, Maruyama and Fukuoka (Japan), and Morro Bay (California, USA). The E2A cable system features: 12. Undersea cables have become central to Southeast Asia's security calculus as the US-China rivalry spills onto the seabed. Disruptions in Europe and Taiwan show how cables can be weaponised, while contested waters and permit demands delay projects and repairs. Use the controls at the top to play the animation or step through year by year. For more details and insights, please read this. The Asia-Pacific fiber optic cable market is experiencing rapid growth, driven by increasing internet penetration, expanding 5G infrastructure, and the rising demand for high-speed data transmission across industries.
