

Electrical distribution box embedded 120

Overview

With a 50A twist-lock inlet, six 120V GFCI duplexes, and a 120/240V 30A locking outlet, it covers all your power needs. Each receptacle features individual overload protection and ground-fault protection, ensuring safety compliance with OSHA standards. Among our distribution boxes you will find the smart and practical solution for your project or business. For indoor use, you can choose between surface-mounted and flush-mounted distribution boxes. It has the short-circuit and over-current protection for the load, and can regularly report the BIT. We seize the future by developing lasting, innovative, high-performance solutions for all types of buildings thanks to our talented and visionary teams. In the Legrand E-catalogue you can access all the detailed information about our products: technical characteristics, data sheets, certificates. Protects electrical and electronic components from moisture, dust, and mechanical impact Suitable for wall mounting or directly on technical surfaces/machines Mounting lugs allow installation without additional brackets Can be used with cable glands or ventilation accessories (as needed) Suitable. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
