

Explosion-proof distribution box exd

Overview

A series of control and distribution panels made from aluminum. Ex d and Ex tb certified for installation in explosion-hazardous areas. Suitable for use in gas group IIB+H 2 environments. These sturdy solutions are certified according to global standards such as ATEX, IECEx. ROSE Aluminium, Polyester and Stainless-Steel Ex Enclosures and Control Stations assure reliable protection for electrical distribution systems in explosion-endangered zones. Customizable configuration of operators, cable entry quantities and cable gland types as per specification. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times. EJBA enclosures are used as terminal boxes or bus bar systems, as junction boxes with terminals, as enclosures for equipment such as control devices, relays, contactors and/or. The explosion-protected junction and pulling boxes, available in different methods of protection and materials, can also be used with terminals, as a command and control units and as interface units depending on the models.
