

FC Fiber Optic Adapter Interface Size

Overview

The FC connector is a fiber optic connector with a screw thread locking mechanism to withstand high-vibration environments. Radiall's FC connector is composed of a plated nickel housing and a 2.5 mm ceramic ferrule and is compliant with the CEI 61754-13 standard. It is commonly used with both single-mode optical fiber and polarization-maintaining optical fiber. FC connectors are used in datacom, telecommunications, measurement, JIS, IEC standard compliant and intermateability test certified. Satisfies flammability rating UL94V-0. While the small size of fibre optic connectors does not mean they play a minor role, the type of connector you use affects the overall efficiency of light transmission across the fibre network. We also provide a family of FC fiber. Adapters are used to mate two fiber optic connectors. They are offered in all major connector interfaces, including SC, FC, ST, LC, MTP and others.
