

Fiber Optic Sensor ER2-18ZW

Overview

High-precision dual-display optical fiber amplifier The ER2-18ZW and ER2-22N models feature dual display functionality for real-time monitoring of optical signal strength and sensor performance with high accuracy and reliability. Advanced diffuse reflection correlation lens technology Equipped with. Would you like to tell us about a lower price?

Help others learn more about this product by uploading a video! Compact and easy to install, equipped with a plastic protective cover, can adapt to complex working conditions such as humidity, and has a longer service life. Equipped with a Chinese digital display screen, the operation is simple and intuitive, without the need for cumbersome code, and debugging. Shenzhen Boyi Jingke Technology Co. is a national high-tech enterprise born and growing in Shenzhen, known for providing reliable products and efficient services.
