

Fiber optic patch cord price 1 5

AI Overview

A 1.5-meter fiber optic patch cord typically ranges from \$5 to \$20 depending on fiber type, connector type, and jacket material.

Pricing Overview

The cost of a 1.5-meter fiber optic patch cord varies based on several factors:

- Fiber Type:** Singlemode (OS1/OS2) or Multimode (OM3/OM4/OM5) fibers influence price, with singlemode generally being slightly more expensive due to longer-distance performance.
- Connector Type:** LC, SC, MPO, or MTP connectors, and whether they are UPC (Ultra Physical Contact) or APC (Angled Physical Contact), affect cost. APC connectors are typically higher priced due to angled polishing that reduces back reflection.
- Jacket Material:** LSZH (Low Smoke Zero Halogen), OFNR (riser-rated), or OFNP (plenum-rated) jackets can increase the price, especially for fire-safe or harsh environment applications.
- Customization:** Custom lengths, colors, labeling, or armored cables may add to the cost, particularly for small orders.

Typical Price Range

- Standard 1.5-meter multimode LC-LC patch cord: \$5–\$10 per unit.
- Singlemode 1.5-meter LC-LC or SC-APC patch cord: \$10–\$20 per unit.
- Armored or LSZH versions: \$15–\$25 per unit depending on supplier and specifications.

Purchasing Options

- Online Retailers:** Websites like ShowMeCables and NetlinkICT offer ready-to-ship 1.5-meter patch cords with same-day shipping options.
- Custom Orders:** Fibertronics and other manufacturers provide custom lengths, connector types, and polish options, with quotes available upon request.
- Bulk Orders:** Ordering in larger quantities can reduce the per-unit cost, especially for OEM or enterprise deployments.

For an exact quote, it is recommended to specify the fiber type, connector type, jacket material, and quantity to the supplier, as these factors directly influence the final price.
