

Fiberglass cable trays in sections

Overview

Typical tray sizes may include compact channel style sections such as 50 x 50 mm, as well as larger options such as 150 x 50 mm and 200 x 50 mm. Covers can be supplied when cable protection, outdoor exposure, or debris control matters. A fiberglass cable tray, also called an FRP cable tray or cable bridge in some regions, is a structural support system used to route and protect electrical and instrumentation cables. It is manufactured from fiber reinforced polyester or vinyl ester resin so it has high corrosion resistance, long. Eaton's fiberglass cable tray is approved by the American Bureau of Shipping (ABS) Building and Classing Steel Vessels 4-8-4A1/9. 1, making it ideal for caustic, harsh and marine environments. Customer: How do I select my straight sections. Cope-GLAS "E" Style siderail profiles are flange-in designs that are especially useful when space is a consideration, such as on closely spaced parallel runs or flush wall mountings. For engineers, procurement managers, utility teams, and OEM cable management buyers, the key question is whether the tray matches the.
