

Galvanized steel sheet for outdoor electrical distribution boxes

Overview

Hot-dip and pre-galvanized steel enclosures rated to NEMA 3R, 4, and IP65/IP66 — engineered for outdoor, corrosive, and high-humidity industrial environments. Available in standard and fully custom configurations with OEM/ODM support. An affordable and robust solution for your outdoor electrical. An electric distribution box, also known as an electrical panel, circuit breaker box, or power distribution board, is a critical component in any electrical system. These enclosures house circuit breakers, fuses, and other protective devices that manage and distribute electrical power safely. Distribute energy safely and smartly! You can use our outdoor power distribution panels, designed for the extreme weather conditions, by fixing them to the wall or the floor. Meanwhile, various design features and accessories, as well as mounting hardware, are also available. KDM's support team consisting of more than 20 engineers will help you find the design most suitable for your applications. Thanks to protection ratings and high quality ble (from 65 x 65 mm up to 361 x 254 mm) plus 3 different cover hei xes are available. Here's something I've seen happen more than once: a project engineer specifies a painted carbon steel enclosure for an outdoor installation, the budget looks good, everyone moves on, and eighteen months later there's rust creeping out from under the door hinge and the maintenance team wants to know.
