

Global Energy Interconnection Development Cooperation

AI Overview

Global energy interconnection aims to create a worldwide, clean, and efficient electricity network through international collaboration, led by the Global Energy Interconnection Development and Cooperation Organization (GEIDCO). Overview of GEIDCO The Global Energy Interconnection Development and Cooperation Organization (GEIDCO), headquartered in Beijing, China, is an international non-profit organization dedicated to promoting sustainable energy development globally . Established in March 2016, GEIDCO has grown to include 1,390 members from 143 countries, encompassing electric power, information technology, environmental protection, energy research, consulting, and finance . Its mission is to implement the United Nations' Sustainable Energy for All initiative, support climate change mitigation, and advance global energy sustainability . Objectives and Strategies GEIDCO promotes the Global Energy Interconnection (GEI) system, which seeks to meet global electricity demand using clean and green energy sources . Key strategies include: Replacing fossil fuels with renewable electricity and electricity-based hydrogen production across industry, transportation, agriculture, and households . Strengthening cross-border and intercontinental grid connections, enhancing digitalization and intelligence of power networks to optimize energy allocation and reduce costs . Promoting technological innovation in energy storage, smart grids, and integration of generation, grid, load, and storage systems . Fostering international cooperation, including South-South and South-North collaboration, energy trade, and joint infrastructure projects to narrow regional energy gaps and support developing countries . Global Initiatives and Impact GEIDCO has actively implemented training programs for nearly 10,000 participants from over 100 countr...
