

Gulf Region Export Wall-Mounted Energy Storage Unit 10kW CIF Price

AI Overview

The CIF price for a 10kW wall-mounted lithium-ion energy storage unit in the Gulf region typically ranges from \$3,000 to \$7,000, depending on battery chemistry, supplier, and customization options.

Price Overview For residential and light commercial applications, 10kW wall-mounted lithium-ion batteries, particularly LiFePO₄ (Lithium Iron Phosphate) models, are widely available in the Gulf region. The SAKO 48V 200Ah wall-mounted battery is an example of a UAE-ready stock unit, designed for easy installation with a built-in Battery Management System (BMS) and IP54 rating for indoor/outdoor use. CIF pricing for such units generally falls between \$3,000 and \$7,000 per 10kW system, depending on the supplier, shipping terms, and any OEM/ODM customizations.

Factors Affecting CIF Price

- Battery Chemistry:** LiFePO₄ batteries cost more upfront (\$300–\$700 per kWh) but offer longer lifespans (up to 6,000 cycles at 80% DoD) and higher safety compared to standard lithium-ion or lead-acid batteries.
- Capacity and Scalability:** Larger or modular systems designed for commercial use may increase the CIF price due to higher energy density and additional components.
- Regional Market Conditions:** Prices fluctuate based on local demand, import duties, and shipping logistics. Gulf countries with established solar markets, like UAE and Saudi Arabia, often have competitive pricing due to local stock availability.
- Customization and Features:** Units with integrated Wi-Fi, stackable modules, or advanced BMS features may command higher prices.

Example Units

- SAKO 48V 200Ah LiFePO₄ Wall-Mounted Battery:** 10kW capacity, IP54, built-in BMS, OEM/ODM options, monthly production up to 5,000 units, CIF price around \$3,500–\$5,500 for standard configurations.
- GSL Energy 10.24kWh Wall-Mounted LiFePO₄ Battery:** 51.2V 200Ah, Wi-Fi enabled, 10-year warranty, suitable for homes...
