

How much does a 12-core fiber optic cable cost per meter

AI Overview

The cost of a 12-core fiber optic cable typically ranges from \$0.50 to \$1.50 per meter, depending on fiber type, jacket material, and environmental rating.

Pricing Overview

For a 12-core fiber optic cable, the price varies based on several factors:

- Fiber Type:** Single-mode (OS2) cables are generally cheaper per meter than multimode (OM3/OM4) cables, though multimode may be preferred for short-distance, high-speed data center applications.
- Jacket Material and Rating:** Indoor-rated PVC or LSZH jackets are less expensive, while outdoor-rated PE jackets or armored cables for harsh environments increase the cost by 20–50%.
- Bulk vs Retail:** Purchasing in bulk reduces the per-meter cost. Retail or pre-terminated cables are more expensive due to factory termination.

Typical Cost Estimates

- Single-mode 12-core cable: Approximately \$0.50 to \$1.00 per meter.
- Multimode OM4 12-core cable: Approximately \$0.70 to \$1.50 per meter.
- Armored or outdoor-rated cables: Can add \$0.20–\$0.50 per meter to the base price.

Additional Considerations

- Installation Costs:** If you include installation, trenching, splicing, and termination, the total cost per meter can increase significantly, sometimes reaching \$2–\$3 per foot in complex outdoor projects.
- Future-Proofing:** OM4 multimode cables are slightly more expensive than OM3 but support higher speeds (40G–100G) and longer distances, offering better long-term value.
- Pre-Terminated vs Field Termination:** Pre-terminated cables save labor and reduce signal loss but cost more upfront.

In summary, for a 12-core fiber optic cable, expect a material cost of roughly \$0.50–\$1.50 per meter, with the final price influenced by fiber type, environmental rating, and whether the cable is pre-terminated or purchased in bulk.
