

How much does a meter of 16-core ASS fiber optic cable cost

AI Overview

The cost of 16-core fiber optic cable typically ranges from \$0.50 to \$3.00 per meter, depending on type, construction, and environmental rating.

Price Range and Factors

The per-meter cost of a 16-core fiber optic cable varies based on several factors:

- Fiber Type:** Single-mode (G652D) cables are generally less expensive than multimode (OM3/OM4) cables, with single-mode suitable for long-distance applications and multimode for short-reach data centers.
- Cable Construction:** Armored cables for outdoor or harsh environments cost more than non-armored indoor cables. For example, a steel-armored 16-core cable with a PE jacket for outdoor aerial or duct use is priced higher than a simple indoor PVC jacketed cable.
- Installation Environment:** Outdoor-rated cables with UV-resistant or direct-burial capabilities increase material costs by 20–50% compared to indoor-rated cables.
- Bulk vs Pre-Terminated:** Bulk cable purchased per meter is cheaper, while pre-terminated assemblies, patch cables, or pigtails carry higher costs due to factory termination.

Typical Cost Estimates

- Wholesale or bulk 16-core single-mode cable:** Approximately \$0.50 to \$1.50 per meter.
- Retail or armored outdoor 16-core cable:** Can range from \$1.50 to \$3.00 per meter depending on jacket type, armor, and certifications.
- High-end or specialty cables** (e.g., low-loss, long-haul, or custom specifications) may exceed \$3 per meter.

Summary

When budgeting for a 16-core fiber optic cable, expect \$0.50–\$3.00 per meter for standard single-mode or multimode cables, with higher prices for armored, outdoor, or pre-terminated options. Always consider the fiber type, environmental rating, and installation requirements, as these factors significantly influence the final cost.
