

How much does a meter of mesh cable tray cost in Dubai

AI Overview

A meter of wire mesh cable tray in Dubai typically costs between AED 120 and AED 350, depending on material, coating, and load capacity. Price Range and Factors

The cost of wire mesh cable trays in Dubai varies based on several key factors:

- Material Type:** Galvanized steel is common and moderately priced, while stainless steel or powder-coated trays for high corrosion resistance are more expensive.
- Tray Dimensions and Load Capacity:** Wider or thicker trays designed for heavy industrial loads cost more per meter.
- Coating and Finish:** Powder-coated trays or hot-dip galvanized trays with higher zinc thickness offer better corrosion protection, especially in coastal or humid environments, increasing the price.
- Project Requirements:** Custom lengths, accessories like dividers or covers, and compliance with UAE fire safety standards (UFC 2018) can affect the final cost.

Typical Applications Wire mesh cable trays are widely used in data centers, commercial buildings, and industrial facilities due to their lightweight structure, excellent ventilation, and flexibility for cable routing. They are ideal for environments requiring high airflow and easy maintenance, such as fiber optic networks and electrical installations.

Supplier Considerations When purchasing in Dubai, consider suppliers that provide:

- Certified products meeting UAE (ESMA) and international standards (IEC 61537)
- Customizable options for specific project needs
- Reliable delivery and installation support for large-scale infrastructure projects

By accounting for these factors, contractors and procurement teams can select a wire mesh cable tray that balances cost, durability, and performance for their specific project.
