

How much does a single-mode 6-core optical cable cost

AI Overview

A 6-core single-mode optical cable typically costs between \$0.30 and \$2.80 per meter, depending on specifications, jacket type, and manufacturer.

Price Range and Factors

The cost of a 6-core single-mode (OS2) fiber optic cable varies based on several factors:

- Material and Fiber Quality:** Generic glass fiber is cheaper, while premium brands like Corning offer lower attenuation and higher reliability, increasing the price.
- Cable Construction:** Outdoor-rated, armored, or LSZH (Low Smoke Zero Halogen) jackets add to the cost. Armored cables can range from \$1.15 to \$6.50 per meter.
- Length and Quantity:** Bulk orders or longer runs reduce per-meter cost, while small quantities or pre-terminated assemblies increase it.
- Customization:** OEM or project-specific requirements, such as color, logo, or connector type, can affect pricing and lead time.
- Installation Environment:** Underground or harsh-environment installations may require additional protective features, slightly increasing material costs.

Typical Pricing Examples

- Wholesale bulk purchase:** \$0.09 to \$1.52 per foot (\$0.30–\$5.00 per meter) for standard single-mode OS2 cable.
- Retail or pre-terminated assemblies:** \$1 to \$6 per foot (\$3–\$20 per meter), depending on connectors and strand count.
- Outdoor durable 6-core cables:** CE-certified, G657A1/A2 fiber for aerial or FTTH use typically falls within the mid-range of these prices.

Additional Considerations

- Project Requirements:** Confirm fiber type, core count, jacket, outdoor rating, and connector plan before requesting a quote to avoid project delays.
- Lead Time:** Custom orders may require additional time for tooling, sample approval, and packaging.
- Long-Term Value:** Single-mode fiber offers lower long-term maintenance costs and supports high-speed, long-distance transmission.

In summary, for a standard 6-core single-mode optical cable, expect \$0.30–\$2.80 per...
