

How much does a waterproof electrical distribution box cost in the Bahamas

AI Overview

Waterproof electrical distribution boxes in the Bahamas typically range from B\$6 to over B\$200 depending on size, material, and specifications.

Small Residential Boxes For smaller, single-gang or junction boxes suitable for outdoor residential use:

- Hubbell 1-Gang Weatherproof Box:** Rugged die-cast aluminum, NEMA 3R rated, with three 1/2-inch threaded outlets, priced locally through CBS Bahamas. This type of box is designed for outdoor lighting or appliance protection and is generally in the B\$50-B\$100 range depending on features and delivery options.
- McRedy Waterproof Junction Box (IP68):** Available via Desertcart Bahamas with free delivery, suitable for small-scale outdoor electrical connections. Prices for similar IP68-rated boxes typically start around B\$40-B\$80.
- PVC Molded Boxes:** Basic 2-gang or ceiling boxes from Kelly's House & Home start at B\$6-B\$7 each, though these are more suitable for indoor or light outdoor use and may not offer full waterproof protection.

Larger Distribution Boxes For full electrical distribution panels or multi-circuit enclosures:

Residential or commercial distribution boxes vary widely in cost depending on amperage, number of circuits, and weatherproof rating. Standard outdoor-rated boxes with multiple circuits can range from B\$150 to over B\$200, with higher-end models including smart monitoring or heavy-duty metal construction costing more.

Installation costs are additional and depend on complexity, local labor rates, and compliance with Bahamian electrical codes. Professional estimates can be obtained from local contractors like Power Glow Electrical, who provide detailed take-offs and cost breakdowns for projects.

Key Considerations

- Material:** Aluminum or stainless steel boxes are more durable and weather-resistant than PVC.
- Rating:** Look for NEMA 3R or IP65/IP68 ratings for outdoor waterproof protection.
- Size and Capacit...**
