

How much does energy-efficient cable tray cost in Malta

AI Overview

Energy-efficient cable trays in Malta typically range from €20 to €80 per meter, depending on material, type, and supplier. Cost Overview The price of cable trays depends on several factors:

- Material:** Galvanized steel, aluminum, or mesh trays vary in cost. Galvanized steel trays are durable and commonly used in industrial and commercial settings, while aluminum trays are lighter and corrosion-resistant, often slightly more expensive.
- Type:** Perforated, non-perforated, or mesh trays affect pricing. Perforated trays allow better ventilation and heat dissipation, which can improve energy efficiency.
- Size and Length:** Standard tray lengths are usually 3 meters, with widths and heights varying. Larger or custom sizes increase cost.
- Accessories:** Bends, T-joints, X-joints, and mounting kits add to the total cost.

Local Suppliers in Malta:

- RS Malta:** Offers a range of cable trays, including wire trays and baskets suitable for commercial and industrial use.
- FBP Malta:** Supplies cable trays and mesh trays for electrical installations.
- Brownrig Supplies:** Provides galvanized steel cable trays and related accessories, suitable for complex routing and energy-efficient installations.
- IEK Cable Installation Systems:** Offers perforated and non-perforated galvanized steel trays with modular accessories for flexible installation.

Practical Advice For a typical energy-efficient installation, expect to pay around €20–€50 per meter for standard steel trays and €50–€80 per meter for aluminum or specialized perforated trays. Additional costs for bends, joints, and mounting hardware may add €5–€15 per accessory. It is recommended to contact local suppliers directly for exact quotes, as prices can vary based on quantity, delivery, and specific energy-efficient features.
