

How much does it cost to work on a distribution box

AI Overview

Replacing or upgrading a residential distribution box typically costs between \$1,200 and \$6,000, depending on amperage, location, and complexity. Typical Cost Ranges 100-125A indoor panel: \$1,200-\$2,500 including labor and materials. 200A outdoor panel with new meter socket: \$3,000-\$6,000. Large or complex upgrades: Costs can exceed \$6,000 if structural modifications, conduit rerouting, or smart meters are involved. Key Cost Drivers Amperage: Higher amperage panels (200A) are more expensive than standard 100A panels. Location: Outdoor installations or hard-to-access areas increase labor costs. Wiring complexity: Longer runs, rerouting, or replacing old wiring adds to the total cost. Permits and inspections: Local code compliance and permit fees can add 5-15% to the total cost. Labor rates: Electricians typically charge \$75-\$120 per hour, with total labor ranging from 6-18 hours depending on project scope. Additional Considerations Material choices: Brand and type of panel, breakers, and enclosures affect pricing. Regional differences: Costs vary by region; urban areas may have higher permit and delivery fees, while rural areas may have lower labor but higher travel charges. Project scope: Mid-range upgrades usually include a replacement panel, new breakers, and modest rewiring, while high-end jobs may involve main-tie breakers, smart meters, or durable outdoor enclosures. In summary, homeowners should budget \$1,200-\$6,000 for a typical distribution box replacement, with the final cost influenced by amperage, installation location, wiring complexity, and local labor rates. Always request itemized quotes from licensed electricians to account for materials, labor, permits, and potential additional work.
