

How to connect the flat iron tee of the cable tray

Overview

Splice plates are the most widely used method for connecting cable tray sections in straight runs. We fix them with nuts and bolts through the holes in the plate and the tray sides. Choosing the right one depends on project conditions, load requirements, and future maintenance needs. Unlike the CT range of tray, the ET range does not come with pre-made fittings, rather, it uses accessories that allow you to bend, rise, or join straight lengths together either in series or to fabricate a. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. When a wire cable tray is cut, the fact that a.
