

Huawei Core Switch Layer 3 7900

Overview

PTN 7900-32 Router is a core device with large capacity, large bandwidth, business intelligence, and software-defined packet transmission and aggregation. This document describes the configuration of Ethernet services, including configuring link aggregation, VLANs, Voice VLAN, VLAN mapping, QinQ, GVRP, MAC table, STP/RSTP/MSTP, SEP, and so on. Huawei works with thousands of partners around the world to deliver innovative products and solutions that are localized to meet your exact requirements. It is mainly positioned at the core layer of the metropolitan area transport network and the provincial / national backbone network, and establishes a bearer network for mobile. PTN 7900-12 Router is new generation of metro optical transmission equipment for packet transmission. It sets up a bearer network for mobile services and major customer dedicated line services with a. In this lesson we will learn Layer 3 VLAN Routing with VLAN Routing Huawei Configuration Example. Because Layer 3 switch can achieve this routing facility.
