The TaiShan 950 SuperPoD is a general-purpose compute pod designed to handle enterprise-grade workloads like application servers, database operations, and enterprise workloads with AI-inferencing support. It will be powered by Kunpeng 950 processors, available in 96-core/192-thread and. China's domestic AI chips took 41% of the accelerator server market in 2025. New data shows Huawei alone shipped roughly 812,000 AI chip units last. DeepSeek AI is trending, and many Chinese companies including Huawei aim to produce new devices based on DeepSeek LLMs. A new report suggests that over 30 firms have initiated the development of machines embedded with smart capabilities. Inputs reveal that Chinese firms like Huawei, Lenovo Group. JD Cloud also released the DeepSeek large model all-in-one machine...
