

Huijue Distribution Box Configuration Price

AI Overview

Huijue distribution boxes offer customizable configurations for low-voltage power and fiber optic applications, with pricing dependent on specifications, materials, and project requirements.

Product Overview

Huijue provides a range of distribution boxes for both electrical and telecom applications:

- Low-Voltage Power Distribution Boxes (HJ-501):** Designed for residential, commercial, and industrial use, these boxes are made from high-quality stainless steel or cold-rolled steel, offering corrosion resistance and durability. They support multiple voltage ratings (12V to 240V) and current capacities up to 100A. Configurations can be customized for dimensions, colors, and internal components, including overload and short-circuit protection, secure electrical connections, and IP-rated protection for indoor or outdoor use.
- Fiber Optic Distribution Boxes:** Huijue's fiber terminal boxes, such as the 16-core HJ-GF-KSW series, are used for optical fiber management and network distribution. These boxes are suitable for telecom infrastructure, supporting splitters, adapters, and fiber splicing. They are available in plastic or metal enclosures and can be configured for wall-mounted or pole-mounted installations.
- Outdoor Integrated Cabinets:** For telecom and energy applications, Huijue offers integrated outdoor cabinets that combine power supply, fiber management, and energy storage. These cabinets are modular, scalable, and designed for harsh environments, often used by operators like China Mobile, China Unicom, and China Telecom.

Configuration Options

Huijue distribution boxes can be customized based on:

- Size and dimensions** to fit installation space
- Material:** stainless steel, cold-rolled steel, or high-quality plastic
- Voltage and current ratings** for electrical boxes
- Number of fiber cores** for optical boxes
- Mounting type:** wall-mounted, pole-mounted, or free-standing
- Additional features:** IP protection...
