

IP55 distribution box standard

Overview

With IP55 rating, it guarantees dust-tight protection and safeguards against low-pressure water jets, making it ideal for both indoor and outdoor installations in challenging environments. Nema Enclosures Manufacturing Corporation uses the IEC's standardized International (or Ingress) Protection Code system for measuring enclosures capabilities. The IP Code reflects the degree of protection as “IP” followed by two numbers; the first digit shows the extent to which enclosures are. Box products are used to contain or enclose materials or equipment in a variety of contexts; plastic or metallic boxes suitable for constructing enclosures for electronic equipment such as guitar pedals, equipment cases for transporting tools or equipment, console style enclosures convenient for. The standard electrical box dimensions range from 200mm up to 1400 mm. Besides, our team can offer your IP 55 panel of your desired thickness (e. For steel enclosures, we suggest 1.5 mm thickness for dimensions up to 600 mm. First digit (0-6):. Browse our latest IP55 Junction Boxes offers. We will also clarify when IP55 is sufficient — and in which cases you may need to consider a.
