

## Imported CFP2OSFP

### AI Overview

CFP2OSFP refers to CFP2 optical transceiver modules, commonly used for 100G Ethernet, which require proper import documentation and compliance with customs regulations. Technical Overview CFP2 modules are high-speed optical transceivers designed for 100 Gigabit Ethernet applications. They are smaller than the original CFP modules—about half the size—allowing higher port density in networking equipment. CFP2 supports multiple transmission modes, including 10x10 Gbit/s lanes or 4x25 Gbit/s lanes, and can interoperate with ribbon fiber cables terminated with MPO/MTP-24 connectors. These modules are widely used in data centers, service provider networks, and enterprise core networks for high-bandwidth connectivity. CFP2 modules are not interchangeable with CFP or CFP4, but they can coexist in the same system for flexible deployment. Import and Customs Considerations When importing CFP2 optical modules, several customs and documentation requirements must be met: Commercial Invoice: Required for customs clearance, detailing the transaction, total value, and currency. It should be submitted in the original and at least one copy, preferably in English. Customs Value Declaration: Needed if the shipment exceeds EUR 20,000, using form DV1 to declare the transaction value including transport and insurance costs. Proof of Origin: Certifies the country of manufacture, which may affect tariffs or trade agreements. HS Code Classification: CFP2 modules fall under optical transceiver HS codes, which are used to determine applicable duties and import regulations. Accurate classification ensures smooth customs processing. Trade Data and Sourcing For businesses looking to source or track imported CFP2 modules, platforms like Tradeindata and TradeAtlas provide detailed customs records, shipment data, and importer/exporter information. These tools allow you to identify suppliers, monitor competitors, and analyze trade trends by country, product, and port. Summary CFP2OSFP modules are essential for high-s...
