

Installation of 6-core ADSS optical cable

Overview

This guide provides general recommendations for the selection of methods, equipment, and tools for the stringing of ADSS (All Dielectric Self-supporting) fiber optic cables including short and Long Span ADSS cables. Each installation will be influenced by local conditions. This document is intended for use solely by those with adequate and suitable. This Installation Manual is a recommendatory installation document provided by HANGZHOU ZION COMMUNICATION CO. The installation manual is established based on the newest issued international standards such as IEEE Std 1222: 2004, "IEEE standard for all-dielectric. ADSS installation requires careful planning, correct tension settings, and smart hardware use. These steps help prevent breaks and signal loss. Since there are numerous practices which may be utilized, Prysmian has tested and determined that the practices described herein are effective and efficient.
