

Installation of fireproof cable trays in Portugal

AI Overview

Fire-resistant cable trays in Portugal should be installed following international standards, fireproofing guidelines, and manufacturer instructions to ensure safety, compliance, and operational reliability.

Standards and Compliance When installing fire-resistant cable trays, it is essential to comply with recognized standards:

- IEC 61537:** Specifies requirements for cable tray systems, including load ratings, material standards, and joint design, applicable internationally and in Portugal for certified installations.
- EN 50200 / BS 476:** Fire performance standards that ensure cable trays maintain circuit integrity under fire conditions.
- Local Regulations:** Portuguese building codes and electrical safety regulations may require adherence to European norms for fire safety and electrical installations. Always verify with local authorities.

Material Selection and Tray Types

- Indoor Installations:** Painted steel or galvanized trays are recommended.
- Outdoor or Corrosive Environments:** Hot-dip galvanized, stainless steel, aluminum alloy, or fiberglass-reinforced plastic trays provide durability and corrosion resistance.
- Fire-Resistant Coatings:** Use fire protection coatings or tapes, such as FLAMMOTECT-A or DG-CR 0.7, to enhance fire resistance and environmental durability.

Installation Best Practices

- Route Planning:** Align cable trays with the building structure, avoiding unnecessary crossings or detours. Maintain the shortest and straightest path possible.
- Segregation:** Separate power and signal cables to minimize electromagnetic interference. Use dedicated trays for each type.
- Supports and Fastening:** Install supports at recommended intervals (typically 1.5–2 meters for horizontal runs) and use fire-rated fastening accessories.
- Penetrations:** Seal openings through walls or floors with fire-rated materials, such as firestop packs, mineral wool, or mastic, ensuring no gaps exceed 1 cm².
- Heat Dissipation:** Use perforated or wire...
