

Installation of fireproof collar for distribution box

Overview

Roxtec recommends that all installations are performed without facility operation. Apply a continuous gas-tight weld all. FirePro® Pipe Collar CE seals service penetration apertures containing plastic pipework by providing a high-volume expansion and pressure seal during a fire. This product will enter its phase-out period on 31 March 2026 and will be fully discontinued as of 1st June 2026. Each pipe collar consists of a white coated circular steel shell that splits in two to fit. SikaSeal®-627 Fire Collar+ is a fire resistant prefabricated pipe collar consisting of a metal casing and an intumescent insert for interior penetration sealing applications. Services within the Firesure™ IPCPR Pipe Collar systems do not require a minimum separation, and only requires sufficient space or separation to securely fit the collars to the substrate. For larger apertures other than described in these. The purpose of this document is to give guidance to approved contractors and suppliers who are engaged in the fire stopping of fire rated structures using the Astro collar. All service holes through floors and compartment walls must be fire stopped to prevent the passage of fire, smoke and hot. BS and UL compliant, FM approved retrofit firestop collar to help create a fire and smoke barrier around existing pipe penetrations. Customers also searched for plastic pipe, combustible, hook or wrap. Please Log in or register to see your company prices. Prices vary for Hawaii, Alaska and US.
