

Installation price of external wall cable distribution box

AI Overview

External wall cable distribution boxes typically range from \$50 to \$500 or more, depending on material, capacity, and protection rating. Price Range and Factors

The cost of an external wall cable distribution box varies widely based on several factors:

- Material and durability:** Outdoor-rated boxes made from UV-resistant or weatherproof materials carry higher prices than standard indoor units.
- Voltage and amperage capacity:** Single-phase residential boxes are generally less expensive, while three-phase commercial or industrial units with higher amperage ratings cost more.
- IP protection rating:** Boxes designed for outdoor use with higher ingress protection (IP) against dust and water are priced higher than indoor-rated units.
- Number of circuits and cable capacity:** Units that can accommodate multiple service cables or larger cable sizes are more expensive.
- Additional features:** Integrated safety devices, smart monitoring, or remote control capabilities can increase the upfront cost.

Typical Price Examples

- Basic residential wall-mounted boxes: \$50–\$150 for single-phase, low-capacity units.
- Commercial or industrial outdoor boxes: \$200–\$500+, especially for three-phase systems, UV-resistant materials, and higher cable capacity.
- Specialized ABC distribution boxes: Designed for pole or wall mounting with UV-resistant material and capacity for multiple service cables, prices are generally in the mid-to-high range of the commercial spectrum.

Where to Buy

Online retailers like Amazon offer a variety of cable distribution boxes with different specifications. Specialized electrical suppliers such as Lucy Electric or Intratec provide outdoor-rated, wall-mounted distribution boxes with detailed technical specifications. Local electrical supply stores may also provide installation services, which can affect the total cost. When budgeting, consider installation, mai...
