

Intelligent remote control switch panel for power distribution cabinet

Overview

This intelligent power distribution unit (PDU) remotely manages and controls the power supply of up to 4 devices via TCP/IP and network connection. Ideal for remote control and management of electrical equipment, whether commercial, residential or industrial. Power status can be monitored over the network. ABB's Low Voltage Products offering encompasses a wide range of electrical products designed to ensure the safe and efficient distribution and management of electrical power in various applications. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities of power. The Liebert® RXV remote power distribution cabinet provides dense power distribution in a small footprint, with up to 400 Amp inputs and 84 poles in a single 24"x12" panelboard.
