

Jsp main distribution box

Overview

JSP series construction site power distribution box, suitable for construction sites or outdoor outdoor work site temporary low-voltage power distribution, power frequency 50Hz, rated voltage 380V AC system power distribution, control, lighting. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Today, electrical systems are essential for homes and industries. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity. jsp view and consumed client-side. html files with some extra syntax, and a couple of minor initial differences: Let's go over some of the key concepts in JSP. The slim design of the power clamping blocks enables a clear and high wiring density.
