

Ladder-type enclosed cable trays available in stock

AI Overview

Ladder-type enclosed cable trays are available in various materials, sizes, and configurations from multiple suppliers, suitable for heavy-duty and corrosive environments. Product Overview Ladder-type cable trays are designed to support and protect power and communication cables while allowing ventilation and easy access for maintenance. They are commonly used in industrial, commercial, and institutional installations. Enclosed or covered ladder trays provide additional protection against dust, debris, and environmental factors, making them suitable for sensitive or harsh environments. Materials and Construction Steel: Hot-dip galvanized, pre-galvanized, or stainless steel (304 & 316L) for heavy-duty and extra heavy-duty applications. Aluminum: Marine-grade 6063-T6 extruded aluminum, corrosion-resistant and lightweight. Glass Reinforced Polyester (GRP): For highly corrosive environments, available in various widths and edge heights. Wire Mesh or Perforated Options: For ventilation and cable heat dissipation. Sizes and Configurations Lengths: Standard 3 m, optional 6 m sections. Widths: 150 mm to 1100 mm depending on the model and load requirements. Edge Heights: 100 mm to 200 mm for standard trays, up to 200 mm for extra heavy-duty. Accessories: Horizontal and vertical fittings, splices, covers, and supports for flexible installation. Suppliers and Availability EAE Electric: Offers heavy-duty ladder-type cable trays in steel, aluminum, and GRP, with optional epoxy or painted finishes. Legrand: Provides metallic ladder trays with a full range of fittings and covers for secure cable management. Bahra Electric: Supplies modular metal and non-metallic cable trays for organized and accessible cable routing. Eaton (B-Line series): Offers metallic and fiberglass ladder systems with high strength-to-weight ratio and CAD/BIM design support. McMaster-Carr: Provides ladder cable trays, heav...
