

MA5671A Optical Module

Overview

OptiXstar MA5671A is a mini plug-and-play Passive Optical Network (PON) access device an Optical Network Unit (ONU) that supports one-stop deployment, even achievable offline when using Gigabit-capable Passive Optical Network (GPON) upstream transmission. SmartAX MA5671A: Access product manuals, HedEx documents, product images and visio stencils. Did you know that you can replace the fiber optic modem/router supplied by your internet service provider (ISP) with a simple SFP stick that runs Linux and does the mapping of light into Ethernet packets directly into your router?

Hack GPON is the ultimate resource with tutorials and guides for. Full function GPON ONT in SFP form factor for flexible and cost-effective fiber access. the need for a purpose built terminal. It can be inserted directly into the SFP slot of an uplink network. In the downstream direction, the MA5671A connects to a switch or router through a GE port to provide the high-speed Internet (HSI) and VoIP services; in the upstream direction, the MA5671A connects to an OLT through a GPON port The SFP Fiber Module. The GPON Stick Optical Module, standardized by the International Telecommunication Union (ITU), is an SFP packaged PON ONU module designed to replace traditional optical modems.
