

Moroccan Enterprise-Grade Optical Router SFP

AI Overview

Enterprise-grade SFP modules in Morocco offer high-performance 10Gbps connectivity over single-mode or multi-mode fiber, with options for short- and long-reach deployments and full enterprise reliability. Overview of Available Modules

1. 10GBASE-LR SFP+ (Long Reach) Supports 10 Gbps over single-mode fiber (SMF) up to 10 km. Enterprise-class design ensures continuous 24/7 operation, extended QA testing, and consistent optical performance. Typically comes with LC duplex connectors and is compatible with major router and switch brands. Available locally in Morocco through suppliers like SIS-IT, with 1-year warranty and 48-hour delivery options.
2. 10GBASE-SR SFP+ (Short Reach) Delivers 10 Gbps over multi-mode fiber (MMF) up to 300 meters at 850 nm wavelength. Ideal for data center top-of-rack (ToR) and aggregation links, providing low latency and predictable performance. Enterprise-class modules are vendor-validated, with tight optical tolerances, digital optical monitoring (DOM), and low power consumption (~1 W).
3. Long-Distance and BIDI Modules Modules like SFP-10G-ER or BIDI SFPs support 10–40 km over SMF using 1310 nm or 1550 nm wavelengths. BIDI modules allow single-fiber operation, reducing cabling complexity, but must be paired correctly (e.g., SFP-10G-BXD1 with SFP-10G-BXU1).

Suitable for campus backbone, inter-building links, or remote enterprise sites.

Key Considerations for Moroccan Enterprises

- Fiber Type:** Choose SMF for long-distance links and MMF for short intra-data-center connections.
- Reach and Power Budget:** Verify Tx/Rx power levels against fiber attenuation to ensure reliable connectivity.
- Compatibility:** Confirm SFP module compatibility with your router or switch vendor and check for DDM support.
- Environmental Conditions:** For outdoor or industrial deployments, consider industrial-grade SFPs with extended temperature ranges.
