

Ning an Galvanized Large-Span Cable Tray

Overview

Durable Material: Quality steel sheet offers long-lasting durability. **Efficient Installation:** Easy setup with. Long-Span Cable Tray is engineered to span large distances (typically 6m+ between supports) without compromising structural stability. Suitable for high-bay warehouses, stadiums, bridges, and industrial facilities with limited support points, it efficiently supports heavy cable loads (power cables).

Cable trays - Cable trays, wide span. Large span cable tray is assembled by pultruded FRP profiles. Large span cable trays can be divided into ladder style, channel style, perforated style with galvanized, powder coated. The raw material of stainless steel cable tray is manufactured by using stainless steel plates to make of different types of materials, and the surface generally does not need to be treated, and the strength and corrosion resistance is much higher than that of the general cable tray. The Cable Tray ng standards, performance standards, test standards and application in this document have been tested extens ompetent professional en completely installed, without damage either to conductors or.
