As leading Manufacturer in the field, ODOT Automation offers a wide range of high-quality industrial switches designed to meet the diverse needs of modern industrial applications. Our industrial switches are built to withstand the harsh conditions of industrial environments, providing reliable. Founded in 2003, ODOT Automation brings over 23 years of expertise in automation control and industrial communication. As a national high-tech enterprise, we focus on R&D, system integration, and technical services. ODOT is ISO9001 certified and a member of PI China, EtherCAT, CC-Link, OPC, and industrial communication technology. As a national high-tech enterprise specialized in industrial communication product R&D, industrial automation control system design, integration and technical services, ODOT has passed ISO9001 certification and intellectual property management system. The 5 Ports Unmanaged Ethernet Switch is a cost-effective, compact networking solution engineered for small offices, smart homes, light industrial control nodes, and edge IoT devices—delivering exceptional simplicity, stability, and space efficiency as the ideal foundation for basic local area. Software download Please log on the official website: www.com and click on the corresponding product page to download. 2. ODOT-MS100T series is a basic plug and play industrial-grade unmanaged Ethernet switch, equipped with 5/8/16 10/100 MB ports, all ports supports IEEE802.3x, supports broadcast storm protection, adapt to various industrial environment, protection grade is IP20.
