

Pigtail with round head square head or small square head

Overview

FC-FC, commonly known as round-to-round pigtail. Generally used as fiber jumpers between ODF racks. A fiber optic pigtail, also known as a fiber optic cable tail, is a type of fiber optic cable assembly that provides connection between fiber optic components or fiber optic cables. Rax Industry pigtail bolt is designed for use on wooden poles, concrete or other power line poles to hang the dead end clamp or suspension clamp. The other end of the hot processing into a braid, used for hanging chain handrails, electrical. Bolts come in a large variety of head and thread styles. Standard carriage bolts come in square neck style, with some parts available in a short neck option. They are characterized by their unique shape, which includes a threaded end and a looped or "pigtail" end that is formed by. Bolts are the type of mechanical fasteners designed with external thread and paired with nuts to be inserted through holes and use to join parts using tightening torque. Bolts need a nut to be functional and the feature makes it different from the screws.
