

PoE switch NVR interface

Overview

To ensure seamless integration, use a PoE switch that's compatible with both your cameras and NVR, then link them via a single Ethernet cable —this enables automatic device discovery, remote access, and uninterrupted high-definition recording with minimal configuration. This direct integration ensures high-quality video transmission, centralized power and data delivery, and simplified network management—ideal. Connecting PoE switch cameras directly to an NVR simplifies surveillance setup by eliminating extra hardware and streamlining power and data transmission. Using an external PoE switch will NOT increase the number of cameras your NVR will support. How you connect the switch to the NVR is a little different based on the type of NVR that you have. Ideally, whenever you use a POE switch you want to use a.
